

EUGENE PAUL BADATO

AI & Full-Stack Software Engineer

Philippines (Remote) | badatoeugenepaulm@gmail.com | eugenebadato.com | linkedin.com/in/eugenebadato | github.com/akocero

SUMMARY

Full-stack software engineer with 8+ years of experience building production web applications, APIs, and AI-powered products. Specialized in Vue.js/Nuxt.js, React, TypeScript, Node.js, Laravel, and PostgreSQL. Currently at HealthcareGPS (US, remote), contributing to MedicareCopilot, an AI platform for Medicare agents. AI-first developer using Claude, Cursor, and the OpenAI API to ship faster. Promoted at three companies; leads projects and mentors developers.

SKILLS

Languages: JavaScript, TypeScript, PHP, Python, SQL, HTML, CSS, C#, VB.NET

Frontend: Vue.js, Nuxt.js, React, Next.js, Tailwind CSS, TanStack Query, Vite, React Native, Flutter

Backend & Data: Node.js, Express, Laravel, REST, GraphQL, Prisma, PostgreSQL, MySQL, MongoDB, Supabase, Firebase

AI: OpenAI API, Claude, Cursor, LLM feature integration, AI-assisted development

Cloud & DevOps: Docker, Git, AWS, Cloudflare (Workers), Vercel, Netlify, Render, DigitalOcean, System Administration

Other: Stripe, Headless CMS (Contentful, Sanity), HIPAA/SOC 2 environments, Code Review, Mentoring

EXPERIENCE

HealthcareGPS Inc.

California, US (Remote)

AI & Software Engineer

Nov 2024 – Present

- Contribute to MedicareCopilot (launched 2026), an AI platform for Medicare agents to compare plans and enroll clients
- Build full-stack features (Nuxt.js, Prisma, PostgreSQL) for HIPAA-compliant, SOC 2 Type II healthcare products
- Integrate LLM-driven functionality into core application workflows and internal tools; design and maintain supporting APIs
- Use AI coding tools (Claude, Cursor) daily with a distributed US team to plan, build, and ship features end to end

Frontend Developer (Part-time)

Feb 2024 – Nov 2024

- Promoted to full-time AI & Software Engineer after 9 months; built responsive, accessible Nuxt.js UI components

Teratomo Corporation

Japan-focused company

Senior Web Developer (Hybrid)

Feb 2023 – Nov 2024

- Led web initiatives: Vue.js frontends and REST APIs on microservices (Node.js, Express, Laravel, Python)
- Delivered Web3-adjacent web solutions for business and marketing operations serving a Japan-focused client base
- Reviewed code and mentored junior developers on best practices and coding standards

Full-Stack Developer (Remote, Part-time)

May 2022 – Feb 2023

- Promoted to Senior Web Developer after 9 months; built and maintained full-stack apps with Node.js and Laravel

Mustard Seed Systems Corp.

Quezon City, PH

Senior Web Developer

Jun 2022 – Feb 2023

- Built enterprise cloud apps and maintained on-premise systems (Laravel, PHP, MySQL, Node.js, C#)

Junior Web Developer

Dec 2020 – Jun 2022

- Promoted from Junior to Senior Web Developer in 18 months; developed and maintained company web applications

Earlier Experience

Game Development Instructor & IT Specialist – STI (taught game design with Scratch and Unity)

2019 – 2020

Associate Software Developer – FbCadCam Software Services (payroll, information, and POS systems)

2018 – 2019

PROJECTS

EugeOS – All-in-one SaaS for online business owners: campaigns, PURLs, funnels, finance, and prospect management, with AI features. (Vue 3, Express, Supabase, Stripe, OpenAI API)

GCash Manager – Mobile web app for sari-sari store owners to track GCash transactions. (React 19, TypeScript, Supabase, TanStack Query, Tailwind)

Hunter x Hunter DB API – Public REST API for characters, episodes, and Nen data. (Node.js, Express, MongoDB, Nuxt.js)

Resignation Letter Generator – AI tool that writes and exports resignation letters as PDF. (Nuxt, OpenAI API)

EDUCATION & AWARDS

Bachelor of Science in Information Technology – La Concepcion College

2014 – 2018

Thesis Awards: Best Overall Thesis, Best System, Best Programmer, Best Defense & Presentation, Highest Individual Grade
